22 New Features, 8 Reshaped

Best Prices in the Industry

X2X New Modular Series

Made for Riders by Riders

2026

STAX-OBSTACLES CO LTD

Established 2013 serving the planet with unique designs for wakepark features.

We're dropping a massive lineup of new features for 2026. Get the industry's best tech at unbeatable prices, more bang for your buck, guaranteed. Our new features with higher density materials and maximum UV protection for a set-up that lasts. Level up your wakepark and ride the future.

Bigger Obstacles. Better Prices. Experience enhanced quality driven by cutting-edge technology and precision tools. NEW FOR 2026: Discover the "Triple S Two," "X2X Series," reshaped units, new boxes, and skate pools. Every feature in our lineup has been optimized for peak performance.

Discover 186 items across 50 pages of premium wakeboard and wakeskate obstacles, floating walkways, and innovative accessories. Global Reach: We ship to over 50 countries worldwide. Expert Support: Our team provides professional consulting, layout design, and setup for any wakepark project.

5 Year Worldwide Warranty Shipping Service to more than 50 Countries

HDPE

Our own HDPE (polyethylene) mixture for extreme weather conditions with anti UV and extra high surface density components. 100% virgin HDPE non recycled for maximum performance, environment friendly, non toxic and long lasting life expectancy.

PS,XPS

Full styrofoam (polystyrene) core. CNC cut and embedded in our features.

PLUG and PLAY

Enjoy effortless assembly and perfect alignment with our custom ridge-and-slot system, featuring fusion-welded connections for maximum joint durability.

SET UP

We provide tools and detailed set up manuals for all our features.

CUSTOM

From initial survey and park layout to cable systems, water treatment, maintenance upgrades, and global logistics, the STAX team provides comprehensive A-Z support to bring your project to life.

PRO TEAM

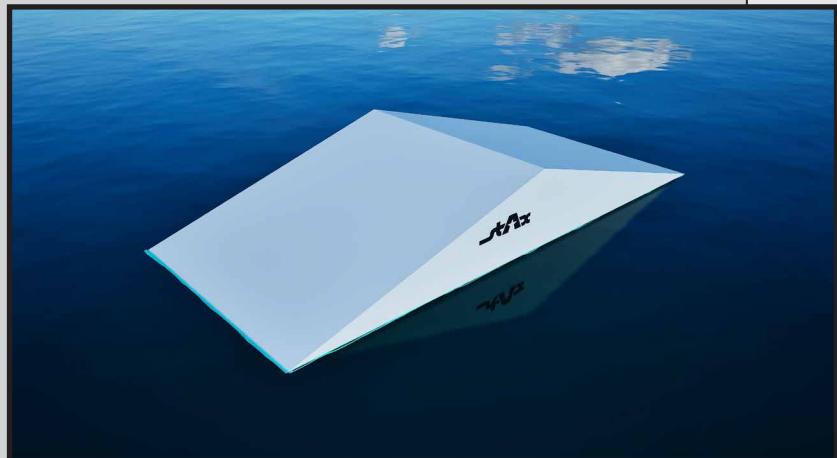

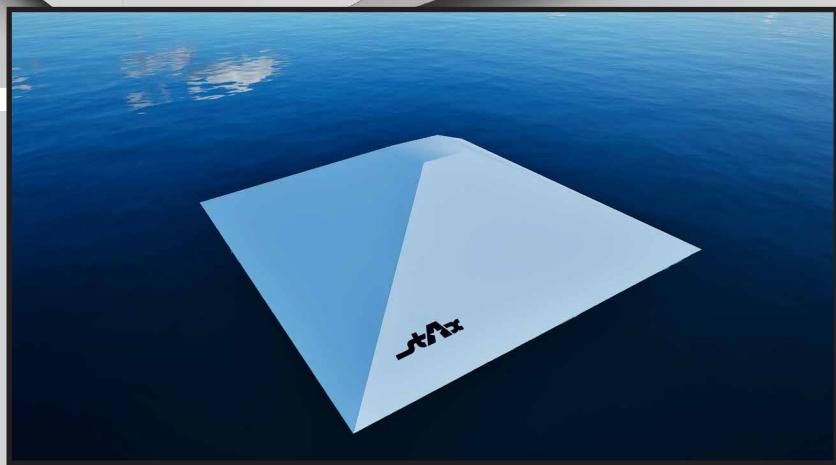

Our international pro team is fluent in multiple languages and dedicated to helping you with park improvements, custom features, professional setup, events, camps, technical support, and more.

skate

Skate designs are just like hitting a ledge or rail at a skatepark. The skate pool features are wider, lower and offer a pool gap with style for skateboard tricks that are fun for wakeboarders too. The relationship between skateboarding and wakeskating is incredibly strong, especially at cable parks. Skate features are often direct interpretations of classic street and skatepark obstacles, allowing wakeskaters to perform varials, flips, grinds or other tricks that come from skateboarding.

pool

These features are the most exciting and visually distinctive features in modern wake parks. A high-level obstacle that combines kicker, water filled gap and ledges, directly inspired by street skateboarding. The Pool Series offers riders to ollie in and out or air trick over the obstacle and stick a clean landing on the ledge. The ledges, stairs, and gaps makes it a premier feature like a true street plaza and often the centerpiece of park events and photoshoots.

custom system set up

The future of 2.0 cable parks. STAX is offering solutions for bi level set ups on land or floating in water. We specialize in delivering 100% custom feature setups tailored specifically for your 2.0 cable system, whether building on land or floating on water. We engineer floating features for peak performance with stability and on land performance by the square meter.

Our pricing model is transparent and efficient. Cost is directly based on the total surface area of the selected features. This ensures you only pay for the rideable surface you need, maximizing the value of your investment.

accessories

Support the infrastructure of your professional, safe, and efficient wake park operation. Safety, Access, and Control. Durable, anti-slip floating walkways provide safe, dry access around the park, quick retrieval and minimizing time spent in the water. Robust, stable starting docks offer ample space for riders and board preparation. They are engineered for high traffic and maximum stability. Wave breakers are essential floating modules designed to dampen surface chop and minimize returning rollers.
